## *Manager's Message*

I am happy that Christian College, Chengannur is bringing out the eighth volume of Campus Communique showcasing the various activities of the college during this academic year. This magazine will help the students to cherish their memories, efforts, friendships, endeavours and strife towards success in academics, co curricular activities and towards life. I appreciate the efforts of the editorial team in making this compilation.

Let us try our best to maintain the Christian College campus as an eco friendly campus. Special care should to groom youngsters on ethical, spiritual and social commitment. Quality may be given preference over qualification in our academic and extracurricular activities. The magazine stands witness to that. The ambience of the college is made conducive to learning and discipline. The social commitment of the college is expressed through building houses for the homeless people in the neighbourhood and by providing food coupons to the fellow needy students. I am happy that certain departments have even adopted Lower Primary Schools in the vicinity to upgrade it to the contemporary educational standards.

Albert Einstein has rightly said that "Education is

what is left after we have forgotten all that we have learned." That means we imbibe a lot from various sources while we are in college. More things are 'caught' rather than 'taught'. Earlier the three P's; Pupil, Pedagogue and Parent, were the key players in education. But now in the Modern age it has changed to three M's namely Mobile, Media and Mates. Mobiles have become a menace as well as a means of information. Media keeps one updated with the global events and upheavals. Peer pressure or the influence of the college mates is so powerful that you cannot evade it. Is our goal of education limited to attain literacy, obtain a career, acquire certain skills or amass information? It should be more and above that. Someone has said "Society creates Burglars and Education creates skilled Burglars. But Gandhiji has stated, Education is to make man, a different man, a better man and a new man." At Christian College, we envision to attain this goal in the life of our students. What we need at this moment is human beings with wisdom, courage and compassion.

As Christian College completes 50 years of glorious service to the society, it is a joy that we have enabled to promote qualitative education and

holistic growth of young men and women who have reached great heights of leadership world over. The presence and speech of the Honourable Governor of Kerala, Justice P Sathasivam at the Golden Jubilee celebrations, was truly inspiring. In an era of chaos and confusion, we need to dream of a campus that promotes rational thinking amidst a peaceful environment. Education should impart the tradition of our Nation and thereby help students to imbibe our culture and its values. Students and teachers ought to understand the importance of our rich and secular cultural heritage. As we culminate our golden Jubilee celebrations may we commit ourselves to create a better society in a beautiful world. May the invisible hand that led us so far enable us to become visible expressions of Love, Unity and Peace. May God bless us all.

With prayers & blessings

**Rt. Rev. Dr. Zacharias Mar Theophilus  
Suffragan Metropolitan**

## *Principal's Message*

Dear friends and students,

With God's boundless mercy and the prayerful support of our beloved Manager, Governing Council, Parents and well wishers, we have successfully completed one more year. Success, quite often results in a feeling of complacency, but it should not deter us from improving further. The past year is always there offering us an opportunity for introspection —to evaluate our thoughts and actions to assess our output. During this academic year, let us strive to keep our eyes, ears and minds open to the needs of the society around us so as to change our outlook, mindset and adopt new techniques and innovative practices that are being practised elsewhere in the World. Many of

our students are yet to be initiated into the field of research that could bring laurels to our institution and lessen human problems. Let us hope that the goal can be achieved soon. I may take this opportunity to express my heartfelt gratitude to all members of the teaching and administrative staff who have positively contributed to the successful completion of 2014-'15 academic year. I would also congratulate my children, who have responded to the call of their dear teachers thereby making this campus lively and liveable a space. Dr. Radhakrishnan always believed that the ultimate aim of education is character formation. Our World is changing so fast and unless our children inculcate humanitarian values to which they can hold fast without being swept away, there is no

point in being educated. Fascist tendencies like sectarianism, communalism and self-centredness are eating away the soul of our nation like cancer cells that multiply very fast forcing the patient to surrender. Amidst such social threats, our college should exist as a beacon of light lighting the darkness that is fast enveloping us, showing the rest of the World what it means to be 'educated'. Let us beseech God Almighty to shower HIS blessings on this institution and all of us who are here so that we could remain on this hill top like a 'lamp on a stand' to make ourselves useful to our fellow beings and lead meaningful lives.
